Progress Report: A Lake and Sea Ice Experiment with Skylab Microwave Radiometry, 457-4.

The only progress that has been made to date on this Project is that involving the planning for the ground truth program. Our phase of the Skylab 4 mission will not happen until the end of December 1973.

We have lined up ground truth work for Lake Ontario to be done by Dr. Rene Ramseier and his team from the Department of the Environment, Ottawa, Canada.

We have lined up two groups to take part in the ground truth program for the Gulf of St. Lawrence. These are scientists from CRREL (Cold Regions Research and Engineering Laboratory) and the Department of Marine Sciences
